**Model: Airgoon Air-Lock WK 8800  
Wireless Network Stabilizer Module**

**Subject: Manufacturing Tune-Up Procedure.**

***This Tune-Up Procedure is for Reference Purposes Only.***

The Airgoon Air-Lock WK 8800, Wireless Network Stabilizer Module is Autonomous by Design meaning: The Performance Specifications are Automatically Hard-Coded via Hardware Design Settings that can not be altered in anyway and without Explicit Design and Topology Knowledge. The Air-Lock WK 8800 by default has been designed to be virtually Tamper-Proof and there are no adjustments that can be made or required by the **“End-User”** that would not be a serious Detriment to the Integrity and Performance of the Design.

**Confidential and Proprietary Information “Not to be Disseminated”.**
